

Are you prepared for **COLD & FLU SEASON?**

Prepare now, save **\$\$\$** later.

WHY YOU NEED TO PREPARE

Without taking necessary preventative measures, cold, flu and other respiratory infections can easily spread amongst foodservice staff. This can leave an operation short-staffed, which could result in lower service levels, leading to less repeat business and lost revenue.

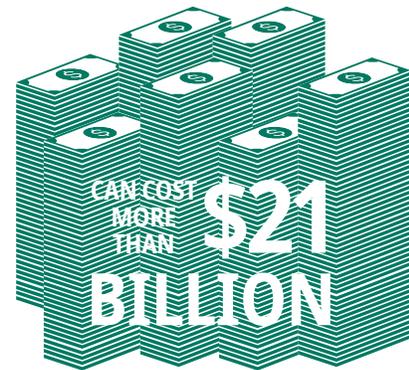

WHAT STEPS FOODSERVICE OPERATORS SHOULD TAKE²

- Require sick workers to stay home
- Encourage staff to avoid people who are sick
- Promote hand hygiene and cough etiquette
- Encourage staff to consider vaccination
- Keep workplace surfaces clean
